SUMMARY

I am Alief Maulana Fikri, a highly motivated individual with strong leadership skills, specializing in leading teams to successfully complete various projects. I have solid expertise in mobile application development using programming languages such as Dart and Kotlin. I am capable of working efficiently both independently and collaboratively to achieve high-quality and optimal results.

EXPERIENCE

PT. Suiten Inovasi Sukses

Jan 2026 - Present

- As Mobile Developer Staff
- I worked on the company's main mobile application using Flutter, where I fixed bugs, improved system stability, and implemented new features based on business. I also handled several client applications

CV. DB KLIK

Dec 2025 - Feb 2026

- As Mobile Developer Intern
- Developed and maintained an e-commerce mobile application using Flutter for Android and iOS platforms, handled bug fixing and feature improvements, managed iOS release setup and deployment configuration, and ensured application stability and compatibility across multiple devices.

PT. Rantangin Digital Indonesia

Mar 2025 - Jun 2025

- As Mobile Developer Intern
- I worked on a digital catering service app where I fixed bugs, added new features, and implemented a payment gateway. I used Flutter for the frontend, Laravel for the backend, integrated Firebase Cloud Messaging (FCM), and managed data with MySQL.

PT. Winnicode Garuda Teknologi

Mar 2025 - Jul 2025

- As Laravel Developer Intern
- I developed a comprehensive news portal website, focusing on delivering dynamic content and ensuring a user-friendly interface for readers. I utilized the Laravel framework for building a robust backend architecture and managed the database using MySQL to ensure efficient data storage and retrieval.

JIR Project - Smart City Application

Oct 2024 - Sep 2025

- As Mobile Developer
- JIR is a smart-city navigation application that provides alternative routes to help users avoid floods and crowded zones. By combining map data, live conditions, JIR guides users to safer and more reliable paths. Developed using Flutter, FastAPI, MySQL, Firebase for FCM

Sleepy Panda Project - Sleep Monitoring Application

Jun 2024 - Sep 2024

- As Mobile Developer
 - Sleepy Panda is a sleep-tracking application designed for employees. It records sleep duration, analyzes sleep quality, and offers personalized AI predictions to help users maintain healthier rest habits and higher workplace productivity. Built with Flutter, FastAPI, MySQL, Firebase.
-

EDUCATION

Mercu Buana University

Sep 2022 - Present

Relevant Coursework : Mobile Application Development, Web Programming.

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM) – Faculty of Computer Science, Mercu Buana University

Research and Technology Division

Sep 2024 - Sep 2025

- Contributed as a Frontend Developer in building the official website for BEM Fasilkom using Laravel and Bootstrap to enhance user experience and interface design for better communication within the faculty.
-
